PROJECT DESIGN PHASE-II
SOLUTION REQUIREMENTS (FUNCTIONAL & NON-FUNCTIONAL)

Date	23October 2022
Team ID	PNT2022TMID07174
Project Name	Intelligent Vehicle Damage Assessment and Cost Estimator for Insurance Companies
Maximum Marks	4 Marks

Functional Requirements:

• Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	• Registration through Form • Registration through Gmail • Registration through LinkedIn
FR-2	User Confirmation	• Confirmation via Email • Confirmation via OTP
FR-3	User Interface	• User friendly and simple website

FR-4	Collect the datasets	- Collect the data from the user side and their vehicle side information. - Collect the data from about Insurance companies plans.
FR-5	Final Results	- Model should be trained with high accuracy. - Results obtained from the model should be displayed to The user with easy interpretability.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	Intelligent model used to assessment the damage in the vehicle and estimate the cost to be provided by the insurance company.
NFR-2	**Security**	The credibility of the user and the confidentiality of user details about their vehicle must be maintained.

NFR-3	**Reliability**	• This scheme can achieve good accuracy in damage estimation and cost estimation, thus providing accurate and unbiased insurance coverage to the user.
NFR-4	**Performance**	• Real-time images are to be captured and uploaded to the website, where the proposed model performs damage assessment and gives the insurance cost accordingly.
NFR-5	**Availability**	• The website should be compatible with web browsers on both mobile phones and computers.
NFR-6	**Scalability**	• The proposed solution will be scalable in the future due to efficient and rapid analysis and accurate cost estimation
